VITA Installation/Removal Tools

Quick Product Overview

SV Microwave has developed a suite of VITA 67.3 tools that simplify the task of installing and removing both contacts and cable assemblies from an embedded systems application. The table below provides a guide to help determine which tool should be used for each of SV's VITA 67.3 products.

VITA 67.3 Tool Product Guide

Tool Part Number	For Use With	Description
500-38-015	1138-4048	This tool installs and uninstalls the removable adapter from the VITA 67.3 SMPM Backplane contact. This long tool (10 inches) is suitable for use when your Backplane is already installed in a chassis.
500-38-014	1138-4048	This tool installs and uninstalls the removable adapter from the VITA 67.3 SMPM Backplane contact. This shorter tool is suitable when your Backplane is not yet installed in a chassis.
500-32-053	1132-4096	This tool installs and uninstalls the removable adapter from the VITA 67.3 SMPS Backplane contact. This long tool (10 inches) is suitable for use when your Backplane is already installed in a chassis.
500-32-052	1132-4096	This tool installs and uninstalls the removable adapter from the VITA 67.3 SMPS Backplane contact. This shorter tool is suitable when your Backplane is not yet installed in a chassis.
500-32-045	VITA 67.3 SMPM Cable Assemblies	Designed to install both Ø.047" and Ø.085" cable assemblies into Backplane and Plug-In Modules. Both 500-32-045 and 500-32-034 accomplish the same task but have been developed to provide the operator with different cable handling options.
500-32-034	All VITA 67.3 SMPM Cable Assemblies	Designed to install both Ø.047" and Ø.085" cable assemblies into Backplane and Plug-In Modules. Both 500-32-045 and 500-32-034 accomplish the same task but have been developed to provide the operator with different cable handling options.
