

California's Proposition 65 Compliance Statement

SV Microwave (SV) is committed to complying with the California Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65), as amended, and its implementing regulations issued by the California Office of Environmental Health Hazard Assessment (OEHHA). Proposition 65 requires businesses to provide clear and reasonable warnings before exposing individuals in California to chemicals listed by the State of California as causing cancer, birth defects, or other reproductive harm, unless an applicable exemption applies.

SV maintains a comprehensive product stewardship and regulatory compliance program to evaluate materials used in our products. Proposition 65 evaluations are based upon supplier declarations, material specifications, engineering documentation, product composition information, manufacturing process information, and other information reasonably available at the time of manufacture.

Where SV determines that a Proposition 65 warning is required, compliant Proposition 65 warnings are applied to products, product packaging, accompanying documentation, or other customer-facing materials, as appropriate, in accordance with applicable California law.

Based on current material information, the following Proposition 65 listed chemicals may be present in certain SV products or product components, depending on product design, materials, and configuration.

Chemical	Typical Materials or Applications	Typical Warning Category
Lead and Lead Compounds	Free-machining brass alloys, copper alloys, solder materials, and certain metallic components.	⚠ WARNING: Cancer and Birth Defects or Reproductive Harm
Beryllium and Beryllium Compounds	Beryllium copper contacts, springs, and other electrical contact components.	⚠ WARNING: Cancer
Cobalt	Certain beryllium copper alloys and specialty metallic materials.	⚠ WARNING: Cancer
Nickel and Nickel Compounds	Nickel plating applied to connector bodies, contacts, and other plated components, including as an underplate for gold, silver, or tin finishes.	⚠ WARNING: Cancer
Chloroprene	Neoprene O-rings, seals, gaskets, and other elastomeric components.	⚠ WARNING: Cancer

For more information, go to www.P65Warnings.ca.gov

SV products incorporate a variety of engineering materials, including brass alloys, stainless steels, copper alloys, plating systems (including nickel, gold, silver, and tin), solder materials, cable jacket materials (including PVC, FEP, PTFE, ETFE, and polyolefin), and elastomer materials (including neoprene, EPDM, silicone, and fluorocarbon materials). The presence of these engineering materials or listed chemicals does not necessarily require a Proposition 65 warning. Warning requirements are determined based on the applicable listed chemical(s), product composition, reasonably foreseeable exposure, and applicable California law.

Product-specific Proposition 65 compliance information, including applicable warning status and identified listed chemicals, is available upon customer request or when required by contractual or regulatory obligations. SV

periodically reviews supplier information, material changes, manufacturing changes, and regulatory updates to support continued compliance with applicable Proposition 65 requirements. This statement will be updated as necessary to reflect significant changes affecting Proposition 65 compliance.

When the immediate product package is not sufficiently large to accommodate a compliant Proposition 65 warning label, the warning shall be applied to the next level of packaging reasonably expected to be viewed by the customer prior to product use. Where physical labeling is impracticable, the warning shall be provided through accompanying documentation and/or electronic product information, as appropriate and consistent with applicable California Proposition 65 requirements.

This statement is intended as a general corporate compliance declaration and does not replace product-specific declarations, customer-specific compliance reports, or regulatory disclosures that may be required under individual customer contracts or applicable regulatory requirements.
